

## The Positioning of Research Establishments

Transfer basic knowledge into industrial applications by further developing and integrating technologies

## Association of European Research Establishments in Aeronautics

# Facts and Figures 2020

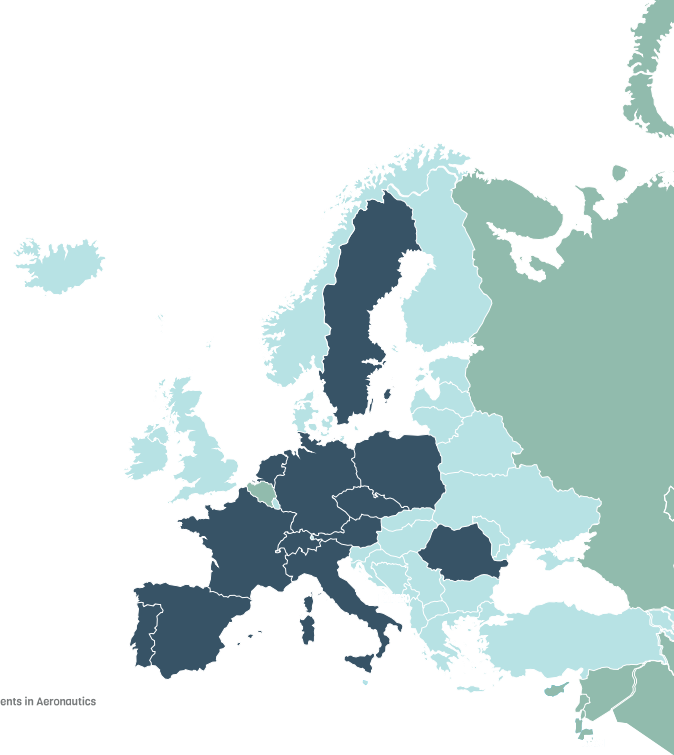

The association of European Research Establishments in Aeronautics (EREA) was created in 1994 by seven major national Research Establishments in the European Union to provide industry, operators and governments with a cost-effective high-quality aviation technology base through the coordinated use of capabilities, resources, personnel and facilities.

EREA is active in the field of civil, military and space related aviation.
